

UNLOCKING THE BIOLOGICAL IMPACT OF DEVELOPMENTAL CANNABIS AND ITS PSYCHIATRIC RISK

Presented by:

Dr. Yasmin L. Hurd, Ph.D.

The Ward-Coleman Chair of Translational Neuroscience,
Director of the Addiction Institute at Mount Sinai

PARTICIPANTS WILL BE ABLE TO:

- Explore cutting-edge evidence on how cannabis exposure during critical developmental periods can alter brain biology and increase vulnerability to psychiatric and substance use disorders later in life.
- Apply research findings to prevention, clinical practice, or public health strategies addressing youth substance use.
- Evaluate implications of increasing cannabis normalization and policy changes for community prevention and treatment approaches.

Thursday April 9 , 2026

10:00 A.M. - 11:00 A.M.
