

VAPING AND MARIJUANA USE IN COLLEGE STUDENTS

This is a free learning opportunity intended to educate individuals on the risk of using e-cigarettes, vape pens, and marijuana use.

WHO IS IT FOR?

- We provide Adult to Adult presentations for resident assistants, college students, campus clubs, student government associations, and more
- Duration: 30-45 minute long presentation

LEARNING OBJECTIVES

- Discuss the dangers associated with vaping flavored nicotine products
- Examine how nicotine affects the brain
- Discuss the chemicals found in flavored vapes
- Examine the affects marijuana has on the brain
- Learn about cannabinoid hyperemesis syndrome
- Obtain cessation resources to help quit nicotine products
